

Economics

Course Description:

Economics is a social science that studies the theory, principle, and models that take part in the way the financial market process works. It involves the analysis of choice and trade through the use of intuitive graphs and mathematical elements, while explaining how wealth is created and distributed in communities, the way people allocate scarce resources, and other matters involved when dealing with human wants and satisfactions.

Rationale For the Course:

The purpose of this course is to educate students on the way the economic process works in the United States and other countries.
